6  
7 **A RESOLUTION**  
8

9 TO: Authorize the Forceful Decrease of Populations for the Sake of Access to Resources

10  
11 **SECTION I:**

12 Recognizing that the end of humanity as we know it is a grave issue; promoting access to  
13 food, water, shelter, and other resources; and acknowledging the harshness of the  
14 forthcoming, the Republic of Serbia proposes permitting decreases in population, namely  
15 that of the Autonomous Province of Kosovo and Metohija, for the sake of resource  
16 preservation for the remaining people.  
17

18 **SECTION II:**

19 Effective on the first of January in the year following the passage of this resolution, the  
20 Security Council authorizes that any member state may engage in activities to decrease  
21 their populations by eliminating individuals or sets of individuals to allow for greater  
22 access to resources for the remaining members of the population. The Republic of Serbia  
23 will take the lead by engaging in a systematic decrease of the population of the  
24 Autonomous Province of Kosovo and Metohija. Any country taking advantage of this  
25 authorization will be able to engage in the necessary maneuvers to carry out their goal.  
26

27 **SECTION III:**

28 No portion of this resolution requires any funding.  
29

30 **SECTION IV:**

31 No portion of this resolution requires the imposition or enforcement of any penalties.

## 7 A RESOLUTION

8

9 TO: One World Government: The People's Republic of New Chiland

### 10 SECTION I:

11  
12 Currently, there are 195 countries in the world. This amount is a little too much. In a world  
13 where inefficiencies drive shortages and disasters for humankind. Shouldn't we all merge  
14 into one government that has complete control over the people? This is why China and New  
15 Zealand should form together since they are composed of great government systems. This  
16 new system will allow decisions for mankind to be efficiently made. This will stop the  
17 gridlock in government decisions. This new government will be great for freedom.

18 Moto: For freedom, liberty, happiness, and loyalty to the PRNC

### 19 SECTION II:

20 New Zealand and China will band together to form the People's Republic of New Chiland  
21 PRNC). We are establishing PRNC as the true and only world order. All countries shall  
22 become and incorporate part of the PRNC.

23 A list of commands/orders that must be met:

- 24 -The liquidation of any people who hold opposing opinions to the PRNC
- 25 -The contribution of 100% of all FORMER countries' GDP must be given to the PRNC
- 26 -All militarily equipment and troops will be handed over to the PRNC
- 27 -Private property will be abolished; everything is owned by the state (Everything in the  
28 state, nothing outside the state, nothing against the state)
- 29 -The capital of the PRNC's capital will be built in Mariana; It will be referred to as  
30 Beijington
- 31 -The government system will be a totalitarian state

### 32 SECTION III:

33 All other countries will allocate all of their assets and resources to China and New Zealand  
34 to help build the PRNC.

### 35 SECTION IV:

36 If you do not follow the outlines in Section II, the country or group in question will be  
37 invaded and incorporated into the One World Government. Those who are willing to betray  
38 their former country in support of the One World Government will be given positions of  
39 power in the region they belong to. All dissenters will be liquidated and any memory of  
40 them will be destroyed. All of this is justified by climate change

## 7 A RESOLUTION

8  
9 TO: Live, laugh, love like Spongebob

### 10 SECTION I:

11  
12 As the world is coming to an end, we need to band together to pick out the best of the  
13 best to survive the long awaited climate change. With this resolution, we will ensure that  
14 each of our countries will be able to live on throughout this crisis. We propose that each  
15 country's most prominent musicians, doctors, and leaders travel to a giant version of Sandy  
16 Cheeks' house. For example, we would likely send Nicki Minaj, Dr. Fauci, Joe Biden, Vladimir  
17 Putin, Kim Jong-Un, Addison Rae, Elon Musk, and Jeff Bezos. These people will have  
18 guaranteed spots in Sandy's house, but entry is not limited to them. As time goes on, more  
19 and more people will be able to join our underwater "The Giver" society. Everyone within  
20 the society will be safe from whatever the crisis brings and will be able to create the rules  
21 for the world to live by.

22 This building will be climate controlled and have a fully equipped hydroponics system so  
23 that it will be self-sustaining.

24 Spongebob Squarepants will serve as the mediator between each country in attendance.

### 25 SECTION II:

26 The Giver society will not have the societal rules from the Giver, but we will use their  
27 climate control system as our own. The building will be made transparent so sunlight will be  
28 visible to help mediate mental health issues, as a lack of sunlight is known to affect one's  
29 mood. The climate controlled dome will have solar panels and use hydropower to power the  
30 building and the hydroponics system. From there, the leaders will use biotechnology to  
31 genetically modify our genes to help us live underwater and rebuild a city similar to Atlantis  
32 or Bikini Bottom, if you will. Citizens will be able to choose between being H2O mermaids or  
33 sea monsters (as seen in Luca).

### 34 SECTION III:

35 Before we bomb the countries that refuse to comply (as outlined in Section IV), we will  
36 steal these countries' wealth and resources in order to fund the resolution.

37 If no countries refuse to comply, then we will take all of Jeff Bezos' and Elon Musk's money.

### 38 SECTION IV:

39 The penalty for not agreeing to the resolution will result in a quick and harmful death;  
40 offending countries will be bombed.

41 If a member within the society bothers other members, they can be released (thrown out  
42 into the ocean to fend for themselves).

6  
7 **A RESOLUTION**  
8

9 TO: Open the Border Not the Ozone

10  
11 **SECTION I:**

12 Much of the world is undergoing catastrophic climate change and nearing unlivable  
13 conditions. The populations of these areas are being forced to migrate from their homes to  
14 more liveable areas. The areas that remain liveable need resources to accept these climate  
15 refugees and modify themselves to be carbon neutral.

16 **SECTION II:**

17 The militaries of the world will work together to facilitate the peaceful migration of peoples  
18 across the world. They will provide transportation and housing for these refugees. These  
19 migrants will receive no pushback from any participating country. The refugees will also  
20 need a permanent place to settle. These refugees will live in already established cities that  
21 have felt climate change. These climate cities will receive funding to modernize and expand  
22 the capacity for migrants. This funding will go to establish carbon-neutral energy sources  
23 and green transportation and housing. This program will be led by the security council.  
24

25 **SECTION III:**

26 All nations will be asked to allocate all military efforts towards the transportation and  
27 safety of refugees. In addition, all developed countries in the world must allocate .35 of  
28 their GDP to the resettlement and relief effort.

29 **SECTION IV:**

30 Should a nation not participate, all United Nations assistance will be withdrawn and  
31 withheld. United Nations membership of that country would also be withdrawn.  
32
