A RESOLUTION

TO: Redirecting Operation ATALANTA to become a UN initiative

SECTION I:

Operation ATALANTA is a European Union Naval Force backed program which provides military and humanitarian aid to piracy affected regions near the Horn of Africa. The mission statement is to protect vulnerable shipping, as well as to deter, protect, and repress piracy. Operation ATALANTA fulfills the goals of both the United Kingdom and France, as it provides a two-prong approach to the complicated topic of global piracy. These nations believe it is imperative to address the current military threat of pirates, as well as the deeper core issue.

Operation ATALANTA has already proven effective in its efforts, operating with a 100% success rate in the deliverance of humanitarian efforts since 2008.

SECTION II:

The UN would model Operation ATALANTA to draw from a greater pool of support to prevent piracy and provide aid to economically poor, piracy affected areas. The scope of Operation ATALANTA would be extended to a global stage, allowing the humanitarian and military disruption activities of Operation ATALANTA to be provided to any nation facing piracy. This program will be operated under the existing infrastructure of the World Food Programme.

SECTION III:

Funding will be provided by the voluntary donation of ships and personal. This is the existing funding for both the World Food Programme and Operation ATALANTA, thus simply following existing status quo.

SECTION IV:

This program has no penalties, as the donation of personal or vessels would be completely voluntary.
