## 7 A RESOLUTION

8

9 TO: Offer Timothée Chalamet as a Sacrifice

10  
11 SECTION I:

12 We don't know whether the aliens are going to be antagonistic towards us. Timothée  
13 Chalamet already looks like an alien. They're probably here for him anyway. Therefore, let's  
14 offer Timothée Chalamet as a peace offering (or sacrifice) to the aliens.  
15

16 SECTION II:

17 Drop Timothée chalamet onto alien spacecraft via drone or something. The specifics don't  
18 matter.  
19

20 SECTION III:

21 The only funding required would be a singular Timothée Chalamet, who I am sure the world  
22 would be happy to get rid of.  
23

24 SECTION IV:

25 Nuke the entire world if they don't give us Timmy.  
26  
27

## 7 A RESOLUTION

8

9 TO: Categorize Aliens as Foreign Exchange Students

10  
11 SECTION I:

12 The United States and India propose to treat the Aliens like the US treats all other  
13 foreigners: teach them american culture (whatever that is). I'm sure they won't attack us if  
14 we give them a cheeseburger.  
15

16 SECTION II:

17 Get them a tour guide, an RV, an I <3 NY t-shirt, some pizza, a "I went to earth and all I  
18 got was this T-shirt" t-shirt, and put them in an ESL class or something.

19 SECTION III:

20 All funding required for this touristy stuff will be paid for with a credit card.

21 SECTION IV:

22 If they don't like the american culture (whatever that is), revoke their visa.  
23

## 6 A RESOLUTION

7  
8 TO: Give the Aliens What They Want, AKA the Pyramids  
9

### 10 SECTION I:

11 As we all know, aliens initiated the dawn of intelligent life on earth and then left to tend to  
12 other planets. To leave evidence of their presence, they built the Pyramids of Giza in Egypt,  
13 as recorded in hieroglyphic records, the lingua franca between humans and aliens. Recently,  
14 when they tried to tell their alien friends what they built on earth, they were met with  
15 disbelief and got triple-dog-dared to prove it. So, they have returned to reclaim their first  
16 architectural creation. Obviously, global warming, among other environmental shifts in the  
17 globe, threw off their relocation capabilities and they just mixed up "penguins" and  
18 "pyramids", which is why they unexpectedly landed in Antarctica on Friday. In order to  
19 provide them with their creation, and prevent the humiliation of our creators by their  
20 intergalactic bullies, we must work together to lead the aliens to the pyramids. They will  
21 then leave peacefully, opening up our skies and eliminating the chaos caused by the alien  
22 presence.

### 23 SECTION II:

24 The purpose of this resolution is to establish communication to return the aliens to the  
25 Pyramids through labeled maps and hieroglyphics. The aliens are capable of  
26 telecommunication, and we would use this method to establish contact. Once the alien life  
27 forms have received the message, they will then use their spacecraft to maneuver to the  
28 Pyramids. A zone of 2 miles from the pyramids would temporarily be cleared of civilians  
29 and blocked off by the UN peacekeepers, in cooperation with the Egyptian military. During  
30 this time, the zone would also be declared as a prohibited airspace to avoid any civilian  
31 casualties that could occur. Using their excavation tools which extend from their  
32 spacecrafts and have previously been confused for weapons, they will pick up the pyramids  
33 and place them in their ships, which are bigger on the inside. To replace the beloved  
34 pyramids, we will place giant inflatable pyramids in their place, as demonstrated by Vector  
35 in the culturally significant film Despicable Me.

### 36 SECTION III:

37 Funding for this resolution will come from the United Nations' Central Emergency Response  
38 Fund as needed.

### 39 SECTION IV:

40 Participation in this resolution is optional so there are no penalties for those countries  
41 who might potentially participate and those who make the terrible, horrible decision to not  
42 participate.

## 7 A RESOLUTION

8

9 TO: Host and Facilitate a Winner-Takes-All Style Arm-Wrestling Match to Effectively Decide  
10 Which of the Two Civilizations Shall Rule the Earth  
11

### 12 SECTION I:

13 The Alien movie series has taught us well that an alien, in general, is by no means a friend  
14 to humanity. The aliens that have recently set foot on our planet are no exceptions to this  
15 fact, and it has become increasingly clear that they indeed mean harm. In fact, they would  
16 much rather conquer our dear planet and enslave us for an eternity. We will not have it! In  
17 order to determine which civilization shall dominate the Earth, Spain and the Philippines  
18 have agreed that a winner-takes-all style arm-wrestling match is by far the most viable  
19 option. Recently, upon completion of a series of low-altitude reconnaissance flights, it has  
20 come to our attention that these aliens do indeed possess arms and hands roughly equal to  
21 the size of our own and therefore will have no excuse to deny such a competition. We  
22 humans will certainly grant the aliens as much learning and practice as they need, but at  
23 the time of competition, we will show no mercy!  
24

### 25 SECTION II:

26 The United Nations Security Council would formulate a fast-acting committee –  
27 encompassing the world powers and other participating member states – to oversee the  
28 construction and management of a large, open-air arena situated near the spacecraft  
29 located in Antarctica, complete with separate stands for the human and alien spectators. It  
30 will by no means be an embarrassingly microscopic arena, and should adequately showcase  
31 the supreme talent of human architecture and engineering as a means to intimidate the  
32 aliens. Furthermore, this arena facility will serve concessions to any and all spectators –  
33 humans and aliens alike – and feature glamorous pyrotechnic displays, intermittent dances  
34 from a selected group of cheerleaders and spirit teams from across the world, and even a  
35 pre-match musical performance from none other than our very own Maggie Lai!  
36

37 Of course, one dire question remains prominent: who do we send to assert humanity's  
38 dominance? After an extensive period of discussion and debate, it has become clear and  
39 evident that Dwayne "The Rock" Johnson is by far the best fit for this position as  
40 humanity's savior, as he is well known throughout the world to possess biceps that are  
41 roughly 23 inches in circumference. Clearly, it is safe to say that "The Rock" will serve our  
42 species well.  
43

1 SECTION III:

2 Considering that this arm-wrestling match could very well be the last sporting event  
3 available to human society, each ticket will be sold to the highest bidder, and will come  
4 with as many amenities and compliments as requested. Additionally, given the  
5 circumstance, each and every member state will be asked to provide as much financing as  
6 possible, for there is quite frankly no excuse to not do so. This match could very well be  
7 our last hurrah as free-willed, liberated humans, so there is no apparent reason for a  
8 member state to not want to pour their funds into this project.

9

10 SECTION IV:

11 Human enslavement is a punishment in and of itself, and in the event that "The Rock" is not  
12 trained enough and unfortunately loses the match, those member states that did not  
13 provide adequate funding will certainly wish they had.

## 7 A RESOLUTION

8

9 TO: Project Reject Outside Brain Extensively (P.R.O.B.E)

10  
11 SECTION I:

12 P.R.O.B.E seeks to find an efficient method of communication between humans and aliens.  
13 In order to accomplish this P.R.O.B.E will construct a team of scientists, whose sole  
14 purpose is to establish a line of communication between the aliens and humanity. Such a  
15 team shall be assembled through a nomination process, whereas each delegation of the  
16 Security Council will nominate one scientist, in any field. After introducing and questioning  
17 the candidates the chamber will elect one head scientist that will act as the director of the  
18 remaining candidates this team will be henceforth referred to as the P.R.O.B.E Commission.  
19

20 SECTION II:

21 Each member country of the Security Council will nominate one scientific representative  
22 and a linguist that will work on the P.R.O.B.E Commission. One of these scientists will be  
23 elected by the Security Council to serve as the Commission Director. The objective of the  
24 P.R.O.B.E Commission will be to design and construct an unmanned device to be sent out to  
25 the alien ship that is currently in Antarctica. This device is meant to serve as a direct line  
26 of communication between the UN and the aliens, interpreted by the linguists. The  
27 Commission Director will be required to submit a progress report at least as often as every  
28 week, or as often as a majority vote of the council requests. The P.R.O.B.E Commission will  
29 remain in effect until it is no longer required for regular communication between the aliens  
30 and the UN (This will be determined by majority vote in the Security Council)  
31

32 SECTION III:

33 The funding for this Commission will come from the Emergency Fund. For the first device,  
34 the Commission Director will be given 4 million USD to split up among the workers, with  
35 their personal wage not exceeding 750,000 USD. Further wages will be determined by the  
36 Security Council based on the Commission's performance.  
37

38 SECTION IV:

39 No punishments are needed.

3 Club(s): MHS, ESA  
4 Topic: Crisis  
5 Resolution Number: 32

6  
7 **A RESOLUTION**  
8

9 TO: Give Twitter to the Aliens

10  
11 **SECTION I:**

12 Honduras and Spain are very concerned over the future of the human race, especially in  
13 regard to the potential havoc these extraterrestrial invaders may have upon the globe.  
14 Spain and Honduras, having come to an agreement will hire the only two men the world can  
15 count on at this time as mercenaries: Will Smith and Jeff Goldblum.

16 **SECTION II:**

17 The Spanish Air Force will loan the Republic of Honduras a Eurofighter Typhoon (capable of  
18 reaching 55,000 feet) in order for our two heroes to get close to the ship over Central  
19 America. Jeff Goldblum will then airdrop a torrented download file for Twitter via a  
20 MacBook Pro. Because the aliens likely don't have a form of the FCC or anti-piracy laws,  
21 they won't have VPNs (Virus Protection Networks). This means that the corrupted twitter  
22 feed would spread between all of the alien ships. After having witnessed unfathomable  
23 horrors on "Trending", the invaders would, no doubt, crash their entire fleet into the  
24 nearest respective ocean.

25 **SECTION III:**

26 We will need approximately \$40,000 (for jet fuel), and \$1500 for the cost of the MacBook  
27 Pro. This money will come from the general fund of the United Nations and donations from  
28 any country that wishes to give it.

29 **SECTION IV:**

30 This is an opt-in program, but considering it is a "Military" operation covering almost half  
31 the globe, this will need approval from the Security Council in order to ensure that  
32 diplomatic laws aren't violated. There will be no penalties for countries who  
33
